## Functional Skills qualifications from Pearson

Functional Skills qualifications from Pearson, the world's leading learning company. We provide a wide range of qualifications, including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications website at qualifications.pearson.com. Alternatively, you can get in touch with us using the details on our contact us page.

## About Pearson

Pearson is the world's leading learning company, with 35,000 employees in more than 70 countries working to help people of all ages to make measurable progress in their lives through learning. We put the learner at the centre of everything we do, because wherever learning flourishes, so do people. Find out more about how we can help you and your learners at qualifications.pearson.com

## Marking Guidance for Functional Skills Mathematics Level 1

## General

- All learners must receive the same treatment. Examiners must mark the first learner in exactly the same way as they mark the last.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded; exemplification will not be exhaustive. When examiners are in doubt regarding the application of the mark scheme, the response should be escalated to a senior examiner to review.
- Mark schemes should be applied positively. Learners must be rewarded for what they have shown they can do rather than penalised for omissions.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the learner's response is not worthy of credit according to the mark scheme. If there is a wrong answer (or no answer) indicated in the answer box, always check the working in the body of the script (and on any diagrams) and award any marks appropriate from the mark scheme.
- Working is always expected. For short questions, where working may not be seen, correct answers may still be awarded full marks. For longer questions, an answer in brackets from the mark scheme seen in the body of the working, implies a correct process and the appropriate marks may be awarded.
- Questions that specifically state that working is required: learners who do not show working will get no marks - full details will be given in the mark scheme for each individual question.

## Applying the Mark Scheme

- The mark scheme has a column for Process and a column for Evidence. In most questions the majority of marks are awarded for the process the learner uses to reach an answer. The evidence column shows the most likely examples that will be seen. If the learner gives different evidence valid for the process, examiners should award the mark(s).
- If working is crossed out and still legible, then it should be marked, as long as it has not been replaced by alternative work.
- If there is a choice of methods shown, then mark the work leading to the answer given in the answer box or working box. If there is no definitive answer then marks should be awarded for the lowest scoring method shown.
- A suspected misread, e.g. 528 instead of 523, may still gain process marks provided the question has not been simplified. Examiners should send any instance of a suspected misread to a senior examiner to review.
- It may be appropriate to ignore subsequent work (isw) when the learner's additional work does not change the meaning of their answer.
- Correct working followed by an incorrect decision may be seen, showing that the learner can calculate but does not understand the functional demand of the question. The mark scheme will make clear how to mark these questions.
- Transcription errors occur when the learner presents a correct answer in working and writes it incorrectly on the answer box e.g. 698 in the body and 689 in the answer box; mark the better answer if clearly only a transcription error. Examiners should send any instance of transcriptions errors to a senior examiner to review.
- Incorrect method if it is clear from the working that the correct answer has been obtained from incorrect working, award 0 marks. Examiners must escalate the response to a senior examiner to review.
- Follow through marks (ft) must only be awarded when explicitly allowed in the mark scheme. Where the process uses the learner's answer from a previous step, this is clearly shown.
- Speech marks are used to show that previously incorrect numerical work is being followed through, for example ' 240 ' means their 240 coming from a correct or set of correct processes.
- When words are used in $\}$ then this value does not need to come from a correct process but should be the value the learner believes to be required. The constraints on this value will be detailed in the mark scheme. For example, \{volume\} means the figure may not come from a correct process but is clearly the value learners believe should be used as the volume.
- Marks can usually be awarded where units are not shown. Where units are required this will be stated. For example, 5(m) indicates that the units do not have to be stated for the mark to be awarded.
- Learners may present their answers or working in many equivalent ways. This is denoted oe in the mark scheme. Repeated addition for multiplication and repeated subtraction for division are common alternative approaches. The mark scheme will specify the minimum required to award these marks.
- A range of answers is often allowed, when a range of answers is given e.g. [12.5, 13] this is the inclusive closed interval.
- Accuracy of figures. Accept an answer which has been rounded or truncated from the correct figure unless other guidance is given. For example, for $12.66 .$. accept $12.6,12.7,12.66,12.67$ or any other more accurate figure.
- Probability answers must be given as a fraction, percentage or decimal. If a learner gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths). If a learner gives the answer as a percentage a $\%$ must be used. Incorrect notation should lose the accuracy marks but be awarded any implied process marks. If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.
- Graphs. A linear scale must be linear, in an appropriate range for the data used, and use consistent intervals. The scale used does not have to start at 0 and not all intervals must be labelled. The minimum requirements for labels will be given, but examiners should give credit if a title is given which makes the label obvious.

## Section A (Non-Calculator)

| PMAT1/N10 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Question | Process | Mark | Mark Grid | Evidence |
| Q1 | Begins to work with percentage <br> Full process to find figures to compare <br> Valid decision with accurate figures from supportive working | 1 or <br> 2 or | A <br> AB <br> ABC | Yes AND 129 <br> NB This question requires working shown |

| :---: | :---: | :---: | :---: | :---: |
| Q3 | Process to find a missing length | 1 | A | $\begin{array}{\|l} \hline 7.6-5.3(=2.3) \text { OR } \\ 4.3-2.8(=1.5) \end{array}$ |
|  | Process to find a relevant area | 1 or | B | $\begin{aligned} & 7.6 \times 4.3(=32.68) \mathbf{O R} \\ & { }^{2} .3 \times \times 1.5{ }^{\prime}(=3.45) \mathbf{O R} \\ & 7.6 \times 2.8(=21.28) \mathbf{O R} \\ & 5.3 \times{ }^{\prime} 1.5{ }^{\prime}(=7.95) \mathbf{O R} \\ & 5.3 \times 4.3(=22.79) \mathbf{O R} \\ & 2.8 \times{ }^{\prime} 2.3^{\prime}(=6.44) \end{aligned}$ |
|  | Process to find total floor area or total number of packs | 2 | BC |  |
|  | Process to find the number of packs | 1 or | D | $\begin{aligned} & \text { e.g. \{area \} } \div 0.4(=73.075) \text { OR } \\ & \text { ' } 21.28^{\prime} \div 0.4(=53.2) \end{aligned}$ <br> NB \{area\} can be one relevant area |
|  | Accurate figure | 2 | DE | 74 |
|  | Total marks for question | 5 |  |  | Edexcel

| Question | Process | Mark | Mark <br> Grid | Evidence |
| :--- | :--- | :---: | :---: | :--- |
| Q4(a) | Measures the correct angle or shows the <br> units | 1 or | A | Measures angle as $95\left({ }^{\circ}\right) \pm 2^{\circ}$ OR <br> Indicates ${ }^{\circ}$ |
| Accurate bearing with units | 2 | AB | $(0) 95^{\circ} \pm 2^{\circ}$ |  |
| Q4(b) | Correct answer | 1 | C | Indicates $\frac{7}{10}$ on the scale |

| Question | Process | Mark | Mark <br> Grid | Evidence |
| :---: | :---: | :---: | :---: | :---: |
| Q5 | Starts to draw a bar chart Develops their bar chart Fully correct bar chart | 1 or 2 or 3 | A <br> AB <br> ABC | one of: linear scale, labels, accurate plotting two of: linear scale, labels, accurate plotting <br> All of: linear scale, labels, accurate plotting <br> Minimum labels required: <br> Horizontal, "(Academic) year, 15/16, 16/17, 17/18, 18/19, 19/20" <br> Vertical "(number of) students" <br> Labels may be implied in title. |
|  | Total marks for question | 3 |  |  |

## Example solution for Question 5

| Question | Process | Mark | Mark Grid | Evidence |
| :---: | :---: | :---: | :---: | :---: |
| Q6 | Begins to work with volume | 1 or | A | $\begin{array}{\|l\|} \hline 1.8-0.3(=1.5) \text { OR } \\ 20 \times 10 \times 1.8(=360) \text { or } 20 \times 10 \times 0.3(=60) \end{array}$ |
|  | Full process to find volume of water | 2 | AB | $\begin{aligned} & 20 \times 10 \times ‘ 1.5{ }^{\prime}(=300) \mathbf{O R} \\ & ' 360^{\prime}-{ }^{\prime} 600^{\prime}(=300) \end{aligned}$ |
|  | Process to convert between units e.g. $\mathrm{m}^{3}$ and litres | 1 | C | e.g. $\{$ volume $\} \times 1000(=300000)$ OR <br> ' $1000 \div 5000 \times 56$ ' $\times$ \{volume $\}(=3360)$ <br> \{volume\} should be calculated or identified e.g. with cubic units |
|  | Process to begin to work with formula | 1 or | D | \{volume in litres $\} \div 5000(=60)$ OR $1000 \div 5000(=0.2)$ |
|  | Full process to work with formula | 2 | DE | $\begin{aligned} & \{\text { volume in litres }\} \div 5000 \times 56(=3360) \text { OR } \\ & 1000 \div 5000 \times 56(=11.2) \end{aligned}$ |
|  | Accurate figure | 1 | F | 3360 |
| Total marks for question |  | 6 |  |  |

| Question | Process | Mark | Mark <br> Grid | Evidence |
| :--- | :--- | :---: | :---: | :--- |
| Q7(a) | Accurate figure | 1 | A | 15 |
| Q7(b) | Accurate figure | 1 | B | 4 |
| Q7(c) | Accurate figure | 1 | C | 27.4 |
| Total marks for question |  |  |  |  |
|  |  |  |  |  |

| Question | Process | Mark | Mark <br> Grid | Evidence |
| :--- | :--- | :---: | :---: | :--- |
| Q8(a) | Full process to find perimeter | 1 or | A | $180+120+215(=515)$ |
| Q8(b) | Valid check | 2 | AB | 515 |
| Total marks for question |  |  |  |  |

| Question | Process | Mark | Mark Grid | Evidence |
| :---: | :---: | :---: | :---: | :---: |
| Q9 | Begins to work with mean | 1 or | A | $\begin{aligned} & 15+26+9+11+20+16+1(=98) \text { OR } \\ & { }^{\prime} 29.25^{\prime}+{ }^{\prime} 50.7^{\prime}+{ }^{\prime} 17.55^{\prime}+{ }^{\prime} 21.45^{\prime}+‘ 39^{\prime}+{ }^{\prime} 31.22^{\prime}+1.95(=191.1) \end{aligned}$ <br> OR $7 \times 25(=175)$ |
|  | Full process to work with mean | 2 | AB |  |
|  | Process to work with costs | 1 or | C | $\begin{array}{\|l} \text { e.g.' } 14 ’ \times 1.95(=27.3) \text { OR } \\ \text { ' } 98 \times 1.95(=191.1) \text { OR } \\ 15 \times 1.95(=29.25) \text { OR } \\ 25 \div 1.95(=12.8 . .) \end{array}$ |
|  | Valid decision with accurate figures | 2 | CD | e.g. Yes AND (£) 27(.3) OR <br> Yes AND 14 and 12(.8..) or 13 |
|  | Total marks for question | 4 |  |  |

| Question | Process | Mark | Mark <br> Grid | Evidence |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Q10 | Accurate labels for the groups <br> Begins to place data into table <br> Data: 4, 5, 6, 7, 8, 10, 11, 12, 12, 13, 14, 15 <br> Correctly completed table | 1 | A | Correct labels for two missing groups 6 to 10 and 11 to 15 oe |  |  |
|  |  | 1 or | B | Populates a table with the data (allow 1 error or omission) NB may only use tallies |  |  |
|  |  | 2 | BC | Correct frequencies OR <br> Correct frequencies ft their three groups NB ignore missing tallies |  |  |
|  |  |  |  | number of treadmills | tally | frequency |
|  |  |  |  | 1 to 5 | II | 2 |
|  |  |  |  | 6 to 10 | IIII | 4 |
