Functional Mathematics

Level 2

Mark scheme

4368

June 2018

Version/Stage: 1.0 Final

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Assessment Writer.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk

Glossary for Mark Schemes

Examinations are marked to award positive achievement.

Marks are awarded for demonstrating the following interrelated **process skills**.

Representing Selecting the mathematics and information to model a situation.

R.1 Candidates recognise that a situation has aspects that can be represented using mathematics.

R.2 Candidates make an initial model of a situation using suitable forms of representation.

R.3 Candidates decide on the methods, operations and tools, including ICT, to use in a situation.

R.4 Candidates select the mathematical information to use.

Analysing Processing and using mathematics.

A.1 Candidates use appropriate mathematical procedures.

A.2 Candidates examine patterns and relationships.

A.3 Candidates change values and assumptions or adjust relationships to see the effects on answers in models.

A.4 Candidates find results and solutions.

Interpreting Interpreting and communicating the results of the analysis.

I.1 Candidates interpret results and solutions.

I.2 Candidates draw conclusions in light of situations.

I.3 Candidates consider the appropriateness and accuracy of results and conclusions.

I.4 Candidates choose appropriate language and forms of presentation to communicate results and solutions.

In particular, individual marks are mapped onto the following **skills standards**.

| | |
|---------------------|--|
| Representing | Making sense of the situations and representing them. A learner can: |
| Ra | Understand routine and non-routine problems in familiar and unfamiliar contexts and situations. |
| Rb | Identify the situation or problems and identify the mathematical methods needed to solve them. |
| Rc | Choose from a range of mathematics to find solutions. |
| Analysing | Processing and using the mathematics. A learner can: |
| Aa | Apply a range of mathematics to find solutions. |
| Ab | Use appropriate checking procedures and evaluate their effectiveness at each stage. |
| Interpreting | Interpreting and communicating the results of the analysis. A learner can: |
| Ia | Interpret and communicate solutions to multistage practical problems in familiar and unfamiliar contexts and situations. |
| Ib | Draw conclusions and provide mathematical justifications. |

To facilitate marking, the following categories are used:

| | |
|-----------|--|
| M | Method marks are awarded for a correct method which could lead to a correct answer. |
| A | Accuracy marks are awarded when following on from a correct method. It is not necessary to always see the method. This can be implied. |
| B | Marks awarded independent of method. |
| ft | Follow through marks. Marks awarded following a mistake in an earlier step. |
| SC | Special case. Marks awarded within the scheme for a common misinterpretation which has some mathematical worth. |
| oe | Or equivalent. Accept answers that are equivalent. eg, accept 0.5 as well as $\frac{1}{2}$ |

| Question | Answer | Mark | Comments |
|----------|---|---|----------|
| 1 (a) | $\frac{1.74 \times 36}{2.4}$ or $62.64 \div 2.4$ or 1.74×15 or 0.725×36 | M1 Ra | |
| | 26.1 | A1 Aa | |
| Check | Reverse calculation their $26.1 \times 2.4 \div 36 = 1.74$ or their $26.1 \times 2.4 \div 1.74 = 36$ or $1.74 \times 36 \div$ their $26.1 = 2.4$ Estimation $2 \times 40 \div 2 = 40$ or $1.7 \times 40 \div 2 = 34$ | B1ft Ab | |
| 1 (a) | Additional Guidance | | |
| | <p>Using values from Data Sheet</p> Correct use of one value → M1A0 $1.56 \times 36 \div 2.4$ or 23.4 or $1.74 \times 24 \div 2.4$ or 17.4 or $1.74 \times 36 \div 1.8$ or 34.8 Use of more than one value → M0A0 | <p>Check</p> Reverse method must be exact reverse of their method. E.g. For $1.74 \times 36 \div 2.4$ must see any exact reverse of this For $62.64 \div 2.4 = 26.1 \rightarrow 26.1 \times 2.4 = 62.64$ Holistic marking Mark 1(a) and 1(a) check holistically | |

| Question | Answer | Mark | Comments | | | |
|---|--|------------------------------|---|---|----------------|-----------------------------|
| 1 (b) | $24 \times 18 + 16 \times 10 = 592$ or $16 \times 28 + 8 \times 18 = 592$ or $28 \times 24 - 10 \times 8 = 592$ or $16 \times 10 + 8 \times 18 + 16 \times 18 = 592$ | B2 <i>la</i> <i>lb</i> | B1 24×18 or 432 or 16×10 or 160 or 16×28 or 448 or 8×18 or 144 or 28×24 or 672 or 10×8 or 80 or 16×18 or 288 | | | |
| | Additional Guidance | | | | | |
| | <p>Award of B2 Must see full and fully correct calculation with answer of 592 to score B2 E.g. $432 + 160$ scores B1 only $24 \times 18 + 16 \times 10$ scores B1 only</p> <p>Award of B1 Award B1 if fully correct calculation is followed by incorrect answer. Award if seen with any dimensionally valid but inappropriate calculation. Treat as choice and do not award if seen with other calculations that are dimensionally invalid Examples of dimensionally invalid calculations</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 50%; border: none;">$16 \times 10 \times 18 \times 8 \times 18$ etc</td> <td style="width: 50%; border: none;">28×10</td> </tr> <tr> <td style="border: none;">$16 + 10 + 18 + 8 + 18$ etc</td> <td style="border: none;">24×8</td> </tr> </table> | | | $16 \times 10 \times 18 \times 8 \times 18$ etc | 28×10 | $16 + 10 + 18 + 8 + 18$ etc |
| $16 \times 10 \times 18 \times 8 \times 18$ etc | 28×10 | | | | | |
| $16 + 10 + 18 + 8 + 18$ etc | 24×8 | | | | | |

| Question | Answer | Mark | Comments |
|---|---|--|---|
| 1 (c) | 592 ÷ 4.8 or 123.3(...) or 123 | M1 Aa | |
| | 592 – their 123 × 4.8 or 1.6 | M1 Ia | their 123 can be any integer < 124 |
| | their 1.6 ÷ 0.3 or 5.3(...) or 6 | M1 Aa | their 1.6 must come from an integer value of their 123 < 124 their 1.6 must give their 6 > 0 |
| | their 123 × 52.5 or 6457.5 or their 6 × 3.82 or 22.92 | M1 Ia | their 123 must be their 123.3(...) rounded down or their 6 must be their 5.3(...) rounded up 6457.5 implies M2 22.92 implies M3 |
| | their 123 × 52.5 + their 6 × 3.82 or their 6457.5 + their 22.92 or 6480.42 | M1 Rc | their 6457.5 and their 22.92 can be from values of their 124 and their 6 that have not been rounded or that have not been rounded correctly |
| 123 (large bags, L) seen and 6 (small bags, S) seen and 6480.42 | A1 Aa | SC1 124 L SC2 6510 SC2 any combination of L and S that covers an area within the range [592, 592.3) e.g. 100 L, 374 S SC3 123 L and 6 S with no cost SC4 any combination of L and S that covers an area within the range [592, 592.3) and correct total cost for their bags e.g. 100 L, 374 S and 6678.68 | |

| | | Additional Guidance | | |
|--------------|---|---|---|---|
| 1 (c) | <p>No rounding → M1M0M0M0M1A0 max No costs → M1M1M1M0M0A0 max Large bag only → M1M0M0M1M0A0 max Small bag only → M0M0M0M1M0A0 max 592 ÷ 4.8 and 592 ÷ 0.3 → M1M0M0M1M1A0 max Incorrect large bags then correct on ft → M1M1M1M1M1A0 max</p> | | | |
| | <p>Example 1</p> <p>592 ÷ 4.8 = 123.3 → 120 L M1</p> <p>592 – 120 × 4.8 = 16 M1</p> <p>16 ÷ 0.3 = 54 M1</p> <p>120 × 52.5 = 6300</p> <p>54 × 3.82 = 206.28 M1</p> <p>6300 + 206.28 = 6506.28 M1</p> <p>120 L, 54 S and £6506.28 A0</p> | | <p>Example 2</p> <p>120 L M0</p> <p>592 – 120 × 4.8 = 16 M1</p> <p>16 ÷ 0.3 = 54 M1</p> <p>120 × 52.5 = 6300</p> <p>54 × 3.82 = 206.28 M1</p> <p>6300 + 206.28 = 6506.28 M1</p> <p>120 L, 54 S and £6506.28 A0</p> | |
| | <p>Example 3</p> <p>592 ÷ 4.8 = 123.3</p> <p>592 ÷ 0.3 = 1973.3</p> <p>123.3 × 52.5 = 6473.25</p> <p>1973.3 × 3.82 = 7538</p> <p>6473.25 + 7538 = 14 011</p> <p>Scores M1M0M0M0M1A0</p> | <p>Example 4</p> <p>592 ÷ 4.8 = 123.3</p> <p>592 ÷ 0.3 = 1973.3</p> <p>123.3 × 52.5 = 6473.25</p> <p>1973.3 × 3.82 = 7538</p> <p>Cheaper with L</p> <p>Scores M1M0M0M0M0A0</p> | | <p>Example 5</p> <p>592 ÷ 4.8 = 123.3</p> <p>592 ÷ 0.3 = 1973.3</p> <p>123 × 52.5 = 6457.5</p> <p>1974 × 3.82 = 7540.68</p> <p>6457.5 + 7540.68 = 13 998.18</p> <p>Scores M1M0M0M1M1A0</p> |
| | | | | |

| Question | Answer | Mark | Comments |
|--|--|------------------------------|--|
| 1 (d) | any three correct from exactly 3 squares with side 1 cm (rockers) exactly 1 square with side 2.5 cm (climbing frame) exactly 2 rectangles 4 cm by 2 cm (swing sets) exactly 1 rectangle 1 cm by 2 cm (sandpit) | B2 <i>Ra</i> <i>Aa</i> | B1 any one correct or any three with same incorrect scale |
| | 1 circle of radius 1.5 cm | B1 <i>Rc</i> | allow freehand attempt |
| | any two in correct positions from 1 or 2 swing sets in part nearer N end exactly 3 rockers in part nearer S end sand pit in SW corner | B1 <i>Aa</i> | do not have to be correct shape or size can be implied by labelling or by sizes in proportion |
| | all 8 items labelled with at least 7 the correct size | B1ft <i>la</i> | |
| | Additional Guidance | | |
| Condone freehand shapes if intention is clear Correct label on one rocker can imply labels on the other two rockers Correct label on one swing set can imply label on the other swing set A rocker can be implied by label in the centre of a square on the grid with square not drawn Allow tolerance of ± 2 mm Nearer N end means the majority of a shape is above the 7th grid line up. Nearer S end means the majority of a shape is below the 7th grid line up. In SW corner means the majority of the shape is below the 7th grid line up and to the left of 6th grid line from the left Maximum mark with one error is B4 | | | |

| Question | Answer | Mark | Comments |
|----------|---|--|---|
| 2 (a) | Alternative method 1 | | |
| | $120 \div (2 + 1) \times 2 = 80$ | B2 <i>la</i> <i>lb</i> | B1 2 + 1 or 3 |
| | Alternative method 2 | | |
| | $80 \div 2 = 40$ or $40 \times 2 = 80$ and $80 + 40 = 120$ or $120 - 80 = 40$ | B2 <i>la</i> <i>lb</i> | B1 $80 \div 2 = 40$ or $40 \times 2 = 80$ or $80 + 40 = 120$ or $120 - 80 = 40$ |
| | Alternative method 3 | | |
| | $120 - 80 = 40$ and $80 \div 40 : 40 \div 40 = 2 : 1$ | B2 <i>la</i> <i>lb</i> | B1 $120 - 80 = 40$ or $80 \div 40 : 40 \div 40 = 2 : 1$ |
| | Additional Guidance | | |
| | Examples $120 \div 3 = 40$ and $80 \div 2 = 40$ $120 - 80 = 40$ and $120 \div 3 = 40$ $40 + 40 = 80$ and $80 + 40 = 120$ $120 \div 3 = 40$ and $40 + 80 = 120$ $80 : 40 \rightarrow 40 : 20 \rightarrow 2 : 1$ $80 : 40 \rightarrow 2 : 1$ $80 : 40 \rightarrow 40 : 20 \rightarrow 4 : 2 \rightarrow 2 : 1$ and $80 + 40 = 120$ $2 : 1 \rightarrow 10 : 5 \rightarrow 40 : 20 \rightarrow 80 : 40$ and $80 + 40 = 120$ $120 - 80 = 40$ and 40 is $\frac{1}{2}$ of 80 | B2 B2 B2 B2 B1 bod B0 B2 bod B2 B2 bod | The ratio 2 : 1 can be implied by diagrams E.g.  By itself this diagram is worth B1 Needs 40 and 80 linked to 120 for B2 |

| Question | Answer | Mark | Comments |
|--------------|--|------------------------------------|---|
| 2 (b) | Alternative method 1 | | |
| | $300 \times \text{their } 80 \div 1000 \times \frac{3}{4}$ or 18 | M3 <i>Ra</i> <i>Rb</i> Aa | ft their 80 from 2(a) M3 is implied by 57.6 M2 any 3 values combined with correct operations M1 any 2 values combined with correct operation |
| | 300 × (120 – their 80) or 300 × their 80 ÷ 2 or 300 × their 40 or 12 000 or 12 | M1 <i>Ra</i> | implied by 18.72 |
| | their 12 000 ÷ 250 or 48 or (1000 ÷ 250) × 0.39 or 1.56 | M1 Aa | implied by 18.72 |
| | their 18 × 3.20 + their 48 × 0.39 or their 18 × 3.20 + their 12 × their 1.56 or their 57.6 + their 18.72 | M1 Aa | their 48, their 18 and their 12 must be > 1 |
| | 76.32 and No | A2 <i>la</i> <i>lb</i> | A1 76.32 or A1ft correct decision for their value must score 3 of the first 5 method marks and the sixth method mark |

| Additional Guidance | | | | | | | | | | | |

| | 62 | A1 Aa | SC1 137 SC2 61 or 63 |

Additional Guidance

Many are confusing £ with points and giving the incorrect 165×4 or 165×0.04

First M1

If their 3200 is 3225 their 128 \rightarrow 129

If their 3200 is 3175 their 128 \rightarrow 127

Second M1

If their 3200 is 3225 37 \rightarrow 38

If their 3200 is 3175 37 \rightarrow 36
