## Functional Skills Level 2

## MATHEMATICS <br> Section A: Non-Calculator Paper <br> Section B: Calculator Paper

## Paper A/B

Time allowed: 30 minutes / 1 hour 30 minutes

## Materials

For this paper you must have:

- mathematical instruments.

You must not use a calculator for section A.
You may use a calculator for section B.

## Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- State the units of your answer where appropriate.

## Information

- The marks for questions are shown in brackets.
- The maximum mark for section $A$ is 15 and section $B$ is 45 .
- The maximum mark for this paper is 60 .
- You may ask for more answer paper, graph paper and tracing paper.

These must be tagged securely to this answer book.
Advice

- In all calculations, show clearly how you work out your answer.

## SECTION A : Non-Calculator

## Answer ALL questions. <br> Write your answers in the spaces provided.

1 Write the following numbers in order of size.

$$
\begin{array}{lllll}
3.2 & 3.27 & 3.72 & 3.702 & 3.02
\end{array}
$$

$\qquad$
$\qquad$
Answer $\qquad$

2 Work out

$$
1 \frac{3}{5}+2 \frac{1}{4}
$$

$4 \quad$ Calculate $6.402+3.545$

## Answer

5 The distance an object has moved from its starting point, $d$, after an amount of time, $t$, is given by the formula

$$
d=29 t^{2}
$$

where $d$ is measured in metres and $t$ is measured in seconds.
Estimate the distance the object has travelled after 5.1 seconds.

7 Some painters are planning on painting a shape on a wall. They have drawn a sketch of the painting below.

Calculate the area the painters are planning on painting.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Answer $\qquad$

8 It would take 7 hours for 3 people to paint the shape on the wall. How long would it take to paint the shape on the wall if another person joins, assuming that they all paint at the same rate?
$\qquad$

Answer $\qquad$

# SECTION B : Calculator 

## Answer ALL questions. Write your answers in the spaces provided.

$9 \quad$ Write in digits five hundred and seven thousand, seven hundred and twenty three.

## Answer

$\qquad$

10 A manufacturing company produce metal fixings for a DIY retailer.
On one day the manufacturer produces 23040 fixings, of which 1920 are faulty.
What fraction of the fixings produced on this day were defective?
Give your answer in its simplest form.

Answer $\qquad$

11 Plot the coordinate $(4,3)$ on the graph below.

12 Darren has been given $£ 6000$ from his parents to put towards a car in the future. He is looking for the best savings account to put his money in for 2 years.

He sees these two savings accounts:

| YTwo savings account | Standard savings account |
| :--- | :--- |
| Save for 2 years and receive | $2.5 \%$ interest added at the end <br> of every year |
| $4.25 \%$ interest |  |

He says that he would have over $£ 50$ more after 2 years if he used the Standard savings account instead of the YTwo savings account.

Is he correct?

15 Demi pre-booked a hire car to use on holiday in Spain. She paid $£ 70$ in total which gave her car hire for 7 days.

When she went on holiday, she realised that it may have been cheaper to hire the car in Spain, instead of pre-booking it.

The cost of the car hire, in Euros $(€)$, in Spain is calculated using this formula:

$$
\text { cost }=0.6(30+15 d)
$$

where $d$ is the number of days the car is hired for.
Demi uses this conversion graph to convert between Pounds $(£)$ and Euros $(€)$.

Work how much Demi would have saved by paying for the car hire in Spain, instead of pre-booking it. Give your answer in Pounds (£).

Answer space provided on next page

15 cont

Answer

16 Whilst Demi is on holiday in Spain, she buys a coat that was reduced by $20 \%$ in a sale. If the sale price was $€ 180$, how much was its original price?

Give your answer in Euros ( $€$ ).

17 The table gives information about the number of girls and boys in Years 9 and 10.

|  | Year 9 | Year 10 | Total |
| :---: | :---: | :---: | :---: |
| Boys |  | 97 |  |
| Girls | 112 |  | 196 |
| Total | 174 |  |  |

Complete the two-way table and use this to find the probability that a student selected at random is a boy.

Answer $\qquad$

19 Donald is a zookeeper. In 2018, he measured the weights of the 6 leopards that are kept in the zoo, and recorded his results in the table below.

| Leopard | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Weight <br> (kg) | 32 | 29 | 27 | 34 | 30 | 27 |

In 2021, the median weight of the leopards was 68 lbs.
$1 \mathrm{~kg}=2.20 \mathrm{lbs}$
Calculate the percentage change in the median weight of the leopards from 2018 to 2021.

21 Nabeela travelled to London by train. Her journey was made up of two parts, including a short wait in between.

One train into York and then another train into London.
The first train departed at 07: 05 and the journey lasted for 12 minutes.
The second train departed at 07:27 and the journey lasted for 122 minutes.
The total distance travelled was 197 miles.
What was Nabeela's average speed for the entire journey?
Give your answer in miles per hour (mph).
