## Functional Skills Mathematics Assessment Level 2

 There are $\mathbf{2}$ sections in this assessment, Part A and Part B.Learner name

Run ID

Learner signature

## Part A - Non-calculator

## You have 30 minutes to complete this section.

## You must not use a calculator.

Instructions to learners
Part A: Non-calculator
You will need a pen, pencil and a ruler. You may need a protractor and compasses.
Use only blue or black ink. Pencil must only be used for drawing.
You can write or draw to show your answers.
You have $\mathbf{3 0}$ minutes to complete Part A.

## Question 3

Find the mode of this data.

## 36400 g 54.2 kg 36.4 kg 56 kg 22.1 kg 4300 g 51.5 kg 75 kg

Show your working out and write your answer in the box below.

## Question 4

Tim has decided to landscape his garden. His garden is a rectangle 11.5 m by 15.75 m .

He wants to have two thirds grass and the rest as a patio. He also wants a shed $3.5 \mathrm{~m} \times 2.25 \mathrm{~m}$ to be placed in any corner of the patio.

Draw a scale drawing on the graph paper below, label the drawing clearly.

## Question 5

$\frac{5}{6}+\frac{13}{4}=$

Show your working out and write your answer in the box below.
Answer $\qquad$

## Question 6

Allen is buying a house, it costs 1 million pounds.
He has a deposit of $£ 378,500$. The remaining amount he will borrow from the bank.

## How much will Allen borrow from the bank?

Show your working out and write your answer in the box below.

Answer $\qquad$

## Question 9

Trevor wants to buy a new lorry for work.
Trevor has to transport milk from the farms.

He will need a lorry that is suitable to carry liquid.

The liquid will be carried in a cylinder.

He has seen two lorries for sale:
Lorry 1 has a capacity of $536 \mathrm{ft}^{3}$
Lorry 2 has the following dimensions: length 19.35 ft and diameter 7.6 ft
$\pi=3.14$

Trevor wants to buy the larger lorry. Which should he buy? Show clearly how you decided.

Show your working out and write your answer in the box below.

Answer $\qquad$ Lorry $\qquad$

## Describe the correlation the data displays.

Write your answer in the box below.
(1 mark)
$\square$

## Question 12

Harry cycles on an indoor track.
The record for distance travelled on an indoor track in an hour is 53.731 km .

Harry cycled 41.829 km in 47.75 minutes.
Harry thinks if he continued at the same speed he could beat the record.

Could Harry beat the record? Show why you think this.

Show your working out and write your answer in the box below.
$\square$

## Question 13

Dave is organising a charity event for his company. The company will increase the total raised by staff by $23.2 \%$.

Dave has collected $£ 321.45$, which is $\frac{3}{5}$ of the money promised by staff.

## How much will be raised in total?

Show your working out and write your answer in the box below.

## Question 14

An Ice Hockey League records the scores for the top two teams after 10 matches.

| Team A <br> Goals Scored per match | Team B <br> Goals Scored per match |
| :---: | :--- |
| 41 | 29 |
| 42 | 51 |
| 55 | 32 |
| 61 | 43 |
| 27 | 32 |
| 19 | 57 |
| 30 | 59 |
| 44 | 41 |
| 49 | Range: |
| 55 | Mean: |
| Range: 42 |  |
| Mean: 42.3 |  |

The coach of Team A says Team A scored more goals on average and were the most consistent goal scorers.

Is the coach correct? Show how you know this.
Show your working out and write your answer in the box below.
$\qquad$

## Question 15

Sonia works in a call centre. She wants to calculate the average length of a call.

She records the following information:

| Length of call <br> (mins) | Frequency |
| :--- | :--- |
| $0-2$ | 40 |
| $3-5$ | 32 |
| $6-8$ | 30 |
| $9-11$ | 25 |
| $12-14$ | 20 |

## Estimate the mean length of a call.

| Liverpool |  | 216 | 34 | 167 | 222 | 107 | 168 | 353 | 299 | 74 | 255 |
| London | 216 |  | 200 | 278 | 114 | 130 | 55 | 282 | 214 | 161 | 43 |
| Manchester | 34 | 200 |  | 136 | 177 | 68 | 157 | 324 | 281 | 40 | 225 |
| Newcastle | 167 | 278 | 136 |  | 252 | 159 | 253 | 481 | 412 | 133 | 299 |
| Norwich | 222 | 114 | 177 | 252 |  | 118 | 159 | 393 | 327 | 144 | 99 |
| Nottingham | 107 | 130 | 68 | 159 | 118 |  | 104 | 323 | 255 | 37 | 160 |
| Oxford | 168 | 55 | 157 | 253 | 159 | 104 |  | 261 | 193 | 137 | 105 |
| Penzance | 353 | 282 | 324 | 481 | 393 | 323 | 261 |  | 75 | 361 | 307 |
| Plymouth | 299 | 214 | 281 | 412 | 327 | 255 | 193 | 75 |  | 293 | 269 |
| Sheffield | 74 | 161 | 40 | 133 | 144 | 37 | 137 | 361 | 293 |  | 197 |
| Southend | 255 | 43 | 225 | 299 | 99 | 160 | 105 | 307 | 269 | 197 |  |

How much will the petrol cost and how long will it take to get to Plymouth in hours and minutes?

Show your working out and write your answer in the box below.
(6 marks)
$\qquad$

## Question 17

Alex wants to invest $£ 14000$ in a savings account for 2 years.

He finds information about two savings accounts. Both accounts pay interest at the end of each year.

| Saver 1 |
| :---: |
| $3 \%$ |
| each year |

## Saver 2

5.3\% for the first year 0.9\% for each extra year

Alex thinks he will earn more interest at the end of 2 years with Saver 1.

## Is Alex correct? Explain your answer.

Show your working out and write your answer in the box below.

Answer $\qquad$

NOCN Functional Skills Mathematics

## Question 18

Zeb received a student loan of $£ 12780$ last year. Her student accommodation cost £142 per week for 30 weeks.

What fraction of her student loan was used to pay for student accommodation? Write the fraction in its simplest form.

Show your working out and write your answer in the box below.

Answer $\qquad$

## Question 19

Markus hires a car for 8 days for a work trip. He travels 378 miles.
The car hire company use the following formula to calculate the total hire cost:

$$
\begin{aligned}
& \text { Hire Cost }=27 d+0.2 m \\
& d=\text { Number of Days } \\
& m=\text { Miles Travelled }
\end{aligned}
$$

Markus can claim $£ 300$ in expenses for car hire.
Will this cover the cost of the car hire? Explain your answer.

Show your working out and write your answer in the box below.

## Question 20

$92(45 \div 5 \times 3)+32=$

Write your answer in the box below.
$\qquad$

## Question 21

Rona is a member of a fishing club. She records the weights of the fish she catches in one day.

| Fish | Weight(g) |
| :--- | :--- |
| 1 | 4356 |
| 2 | 4851 |
| 3 | 4985 |
| 4 | 4913 |
| 5 | 4803 |

The heaviest fish caught by a club member was 10.8 lbs .

$$
1 \mathrm{lb}=0.454 \mathrm{~kg}
$$

What is the percentage difference between the median weight of fish Rona caught and the heaviest fish caught by a fishing club member?

Show your working out and write your answer in the box below.
