## Maths Paper 1

Mark Scheme

Functional Skills in Mathematics Level 2 - Mark scheme

## Paper 1

| Task 1 (noncalculator) | Process | Total mark | Mark allocation | Comments | $\begin{aligned} & \text { P or } \\ & \mathbf{U} \end{aligned}$ | Subject content |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Question 1 | Correct order | 1 | 1 mark: 3.02, 3.2, 3.27, 3.702, 3.72 | Do not accept largest to smallest | U | 9 |
| Question 2 | Correct division | 1 | 1 mark: $12028 \div 8=1503.5$ |  | U | 2 |
| Question 3 | Convert fractions to have the same denominator Fractions correctly subtracted | 2 | 1 mark: $\frac{5}{7}-\frac{1}{3}=\frac{15}{21}-\frac{7}{21}$ |  | U | 7 |
|  |  |  | 1 mark: $\frac{15}{21}-\frac{7}{21}=\frac{8}{21}$ | Accept equivalent fractions e.g. $\frac{16}{42}$ | U | 7 |
| Question 4 | List in order of size <br> Correct median | 2 | $\begin{aligned} & 1 \text { mark: Correct order i.e.: } \\ & 11,13,14,14,17,18,19,23,25,27 \end{aligned}$ | May be implied if 17.5 seen | U | 23 |
|  |  |  | 1 mark: $(17+18) \div 2=17.5$ (pages) | Units not required | U | 23 |
| Question 5 | Ratio of the cost of pages <br> Finding 1 part of the ratio <br> Total number of pages | 3 | 1 mark: Ratio of the cost of black and white pages in pence $\text { i.e. } 4 \times 10 \text { p }: 1 \times 15 p=40 p: 15 p$ |  | P | 11 |
|  |  |  | 1 mark: Finding the amount of pages for 1 part i.e. $550 \div 55=10$ (pages) |  | P | 11 |
|  |  |  | 1 mark: Total number of pages i.e. $5 \times 10=50$ (pages) | Units not required | P | 11 |
| Question 6 | Calculate hours for 1 worker <br> Calculate hours for 4 workers <br> Amount paid for 6 workers and 4 workers <br> Difference between amounts paid | 4 | 1 mark: $6 \times 16=96$ hours for 1 worker | Allow alternate methods | P | 11 |
|  |  |  | 1 mark: $96 \div 4=24$ hours for 4 workers | Allow alternate methods | P | 11 |
|  |  |  | $\begin{aligned} & 1 \text { mark: } 16 \times 10.50=(£) 168 \text { and } \\ & 24 \times 10.50=(£) 252 \end{aligned}$ | Allow method of finding difference in hours first | P | 2 |
|  |  |  | 1 mark: $252-168=(£) 84$ | Allow FT for their previous calculations | P | 2 |
| Question 7 | Number of students with one sibling $\div$ Total number of students Simplifying fraction | 2 | 1 mark: $\frac{12}{4+12+8+3+1+2}=\frac{12}{30}$ |  | P | 27 |
|  |  |  | 1 mark: $\frac{12}{30}=\frac{2}{5}$ | Only accept $\frac{2}{5}$ for 2 marks | P | 27 |

| Task 2 | Process | Total mark | Mark allocation | Comments | $\begin{aligned} & \text { P or } \\ & \mathrm{U} \end{aligned}$ | Subject content |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Question 8 | Finding the radius | 4 | 1 mark: $r=12 \div 2=6$ (inches) | May be implied if 6 seen | P | 16 |
|  | Calculating the area <br> Area of individual slice <br> Correct units |  | $\begin{aligned} & 1 \text { mark: Area }=3.14 \times 6^{2}= \\ & 113.04 \text { (inches }^{2} \text { ) } \end{aligned}$ |  | P | 16 |
|  |  |  | 1 mark: $113.04 \div 8=14.13$ |  | P | 16 |
|  |  |  | 1 mark: inches ${ }^{2}$ | Units required for full marks | P | 16 |
| Question 9 | Find the midpoints <br> Sum of midpoints $\times$ frequencies <br> Divide by total number of workers | 3 | 1 mark: 5.5,15.5 and 25.5 |  | P | 24 |
|  |  |  | $\begin{aligned} & 1 \text { mark: }(5.5 \times 12)+(15.5 \times 14)+ \\ & (25.5 \times 9)=512.5 \end{aligned}$ |  | P | 24 |
|  |  |  | 1 mark: $512.5 \div 35=14.642 \ldots=15$ (miles) | Units not required | P | 24 |
| Question 10 | Plot coordinate on grid | 1 | 1 mark: Point plotted correctly on graph | See figure 1 | U | 19 |
| Question 11 | Calculate the decimal | 2 | 1 mark: Correct calculation, i.e. $(133 \div 380=0.35)$ converted to $\frac{35}{100}$ |  | U | 8 |
|  | Convert to fraction in simplest form |  | $1 \text { mark: } \frac{7}{20}$ |  | U | 8 |
| Question 12 | Start process to find cost per litre for one person | 5 | 1 mark: Start of correct process. i.e. $\begin{aligned} & (4 \times 1)+(5 \times 0.5)+(9 \times 0.75) \\ & =13.25 \text { litres } \end{aligned}$ <br> or $(8 \times 1)+(10 \times 0.5)=13$ litres or $(9 \times 1)+(9 \times 0.5)+(5 \times 0.75)=$ 17.25 litres |  | P | 15 |
|  | Finding price per litre for Jack |  | $1 \text { mark: } \frac{8.96}{13.25}=£ 0.676 \text { per litre }$ | Allow FT for their cost | P | 15 |
|  | Finding price per litre for Sophie |  | 1 mark: $\frac{8.92}{13}=£ 0.686$ per litre | Allow FT for their cost | P | 15 |
|  | Finding price per litre for Kabira |  | 1 mark: $\frac{11.77}{17.25}=£ 0.682$ per litre | Allow FT for their cost | P | 15 |
|  | Stating who got the cheapest water per litre |  | 1 mark: Jack bought the cheapest water per litre. |  | P | 15 |

| Task 3 | Process | Total mark | Mark allocation | Comments | $\begin{aligned} & \mathrm{P} \text { or } \\ & \mathrm{U} \end{aligned}$ | Subject content |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Question 13 | Finding the radius of the sphere <br> Calculating the volume of the sphere | 4 | 1 mark: $r=\frac{d}{2}=\frac{8}{2}=4(\mathrm{~cm})$ | May be implied if 4 seen | P | 17 |
|  |  |  | 1 mark: Volume of the sphere, i.e. $\begin{aligned} & \text { Volume }=\frac{4}{3} \times 3.14 \times 4^{3} \\ & =267.9466667\left(\mathrm{~cm}^{3}\right) \end{aligned}$ |  | P | 17 |
|  | Correct density formula <br> Calculating the mass of the paperweight |  | $1 \text { mark: Denisty }=\frac{\text { Mass }}{\text { Volume }}$ |  | P | 15 |
|  |  |  | $\begin{aligned} & 1 \text { mark: Mass }=8.23 \times 267.9466667= \\ & 2205 \mathrm{~g} \end{aligned}$ | Answer to nearest whole number <br> Allow FT from their rounded figures Units required | P | 15 |
| Question 14 | Correct plan drawn | 1 | 1 mark: Correct plan, i.e. | See figure 2 | U | 21 |
| Question 15 | Calculate population after 1 year <br> Calculate population after 2 years <br> Population of children | 3 | 1 mark: Year 1: $120000 \times 1.05=126000$ | May be implied if 126000 seen | P | 6 |
|  |  |  | 1 mark: Year 2: $126000 \times 1.05=132300$ | May be implied if 132300 seen Allow FT for their figure for population after 1 year | P | 6 |
|  |  |  | 1 mark: $\frac{1}{3} \times 132300=44100$ |  | P | 6 |
| Question 16 | Calculate perimeter <br> Convert to inches. | 2 | $\begin{aligned} & 1 \text { mark: Perimeter }=5.6+5.6+11.5= \\ & 22.7 \mathrm{~cm} \end{aligned}$ | May be implied if 22.7 seen | U | 16 |
|  |  |  | 1 mark: $22.7 \times 0.394=8.9438$ inches | Accept correctly rounded values, i.e. 8.9, 8.94, 8.944 Allow FT for their perimeter Units required | U | 14 |
| Question 17 | Area of wall in centimetres | 5 | 1 mark: $4 \mathrm{~m}^{2}=40000 \mathrm{~cm}^{2}$ | May be implied if $40000 \mathrm{~cm}^{2}$ seen | P | 14 |
|  | Area of a single tile and box of tiles |  | $\begin{aligned} & 1 \text { mark: } 10 \times 20=200 \mathrm{~cm}^{2} \text { and } 0.32 \mathrm{~m}^{2}= \\ & 3200 \mathrm{~cm}^{2} \end{aligned}$ | May be implied if $200 \mathrm{~cm}^{2}$ and $3200 \mathrm{~cm}^{2}$ seen | P | 16 |
|  | Process to find amount of single tiles or full boxes needed |  | 1 mark: $\frac{40000}{200}=200$ single tiles or $\frac{40000}{3200}=12.5$ boxes $=13$ full boxes | Allow FT for their figures for Area | P | 2 |
|  | Cost of buying single tiles or cost of buying boxes of tiles |  | $\begin{aligned} & 1 \text { mark: } 200 \times 0.49=(£) 98 \\ & \text { or } 13 \times 7.99=(£) 103.87 \end{aligned}$ | Allow FT for their figures for single tiles / full boxes needed | P | 13 |
|  | Cheapest option chosen |  | 1 mark: Single tiles are better value | £98 and $£ 103.87$ must be seen for full marks Allow FT if incorrect costs | P | 13 |

| Task 4 | Process | Total mark | Mark allocation | Comments | $\begin{aligned} & \text { P or } \\ & \mathbf{U} \end{aligned}$ | Subject content |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Question 18 | Correct correlation described | 1 | 1 mark: Positive correlation | Allow as one increases the other increases, or alternate wording | U | 28 |
| Question 19 | Calculate mean of both classes <br> Calculate range of both classes <br> Comment on which class performed better and which class was more consistent | 4 | 1 mark: Class 1A: $864 \div 12=72$ Class 1B: $796 \div 12=66.33$ |  | P | 25 |
|  |  |  | 1 mark: Class 1A: 91-52=39 Class 1B: $82-52=30$ |  | P | 25 |
|  |  |  | 2 marks: Class 1A performed better, as the mean score was greater Class 1B were more consistent, as the range was smaller | Allow converses <br> 1 mark for each statement Allow FT for incorrect mean or range calculations | P | 25 |
| Question 20 | Substitute original and new personal allowance into formula given <br> Calculate difference between tax | 2 | $\begin{aligned} & 1 \text { mark: } T=\frac{27500-12570}{5}=(£) 2986 \text { and } \\ & T=\frac{27500-12850}{5}=(£) 2930 \end{aligned}$ | Both calculations required | P | 3 |
|  |  |  | 1 mark: $2986-2930=(£) 56$ |  | P | 3 |
| Question 21 | Angles around a point = $360^{\circ}$ <br> Correct division | 2 | 1 mark: $x=360 \div 8$ |  | U | 22 |
|  |  |  | 1 mark: $x=45^{\circ}$ | Units not required | U | 22 |
| Question 22 | Use map scale to calculate distance between Manchester and Newcastle. Convert to miles | 6 | 1 mark: Distance $=7.5 \times 30.8 \mathrm{~km}=231 \mathrm{~km}$ | Allow any valid method to convert distance | P | 18 |
|  |  |  | 1 mark: Distance in miles there an back: $=(231 \div 1.6) \times 2=288.75$ miles | Calculation can be done in either order | P | 14 |
|  | Work out how many gallons of fuel needed Convert to litres |  | 1 mark: $288.75 \div 50.3=5.74$ gallons | Allow FT for their distance in miles | P | 10 |
|  |  |  | 1 mark: $5.74 \times 4.5=25.83$ litres | Allow FT for their figure for gallons of fuel needed | P | 14 |
|  | Calculate litres of fuel bought <br> Compare amount of fuel needed with amount in the car |  | 1 mark: $£ 32.01 \div £ 1.65=19.4$ litres | Accept alternate method of calculating how many gallons was already in the car, i.e. $19.4 \div 5.74$ | P | 10 |
|  |  |  | 1 mark: Marcus does not have enough fuel - he needs 25.83 litres, but only has $19.4+$ $6=25.4$ litres | Both figures must be seen for final mark Reasoning required Accept sensible alternative methods Allow FT for their calculations | P | 10 |
